

IN THE CLAIMS

Please amend claims 256 and 259 as follows:

---

--256. (CURRENTLY AMENDED) A method of providing a user access to programming material, comprising the steps of:

5       imprinting a machine recognizable feature within an advertisement;

*B1*       scanning said machine recognizable feature of said advertisement; and

10       transmitting data associated with said machine recognizable feature via a communication link to access said programming material, wherein said programming material is related to said advertisement.

---

15

20

259. (CURRENTLY AMENDED) A method of providing a user access to supplemental programming material associated with a advertisement, comprising the steps of:

imprinting a machine recognizable feature within said

5 advertisement, wherein said machine recognizable feature has associated therewith a command sequence for accessing programming material;

B2

scanning said machine recognizable feature within said

advertisement and downloading data indicative of

10 said machine recognizable feature via the Internet to a remote server;

accessing programming material from said remote server; and

transmitting said programming material to said user

15 allowing said user to perceive said programming material in a humanly perceivable form, wherein said programming material is related to said advertisement.--
